

## TIBCO EBX 6 Custom Forms and Scripting Training

Duration 1 day

Is a standard generated user interface screen not completely satisfactory? You can do an even better job with a custom layout. This training teaches how standard layouts can be fully adapted to your needs without any Java programming. Add calculated fields with the native EBX scripting language. This scripting language is also used to create dynamic access rules to your reference and master data.

### Objectives

Define and model a custom form

### Participants

Business user  
Developer

### Required experience

EBX Foundation training  
Basic programming experience

### Contact

[education@systemation.nl](mailto:education@systemation.nl)
